KMOTS 2019

First International Workshop on Knowledge and MOdel-driven engineering in formal development of Trustworthy Systems

<u>Régine Laleau</u> (LACL,UPEC,France) Shin Nakajima (NII, Japan)

Elena Troubitsyna (KTH, Stockholm, Sweden)

- The workshop is following the workshops **FM&MDD** (Formal and Model-Driven Techniques for Developing Trustworthy Systems) 2016, 2017 and **IMPEX** (Handling IMPlicit and EXplicit knowledge in formal system development) 2017, co-located with ICFEM 2016 and ICFEM 2017

- **Aim of the workshop**: advancing the understanding in the area of developing and applying formal and model-driven techniques that integrate domain knowledge for designing trustworthy systems
